NOTICE OF PUBLIC HEARING
concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS
(NPDES PERMIT NO. CA0079731)
FOR
THE CITY OF REDDING
CLEAR CREEK WASTEWATER TREATMENT PLANT
SHASTA COUNTY**

The City of Redding (Discharger) owns and operates the Clear Creek Wastewater Treatment Plant (Facility), a publically-owned treatment works located at 2220 Metz Road near Anderson, Shasta County. The Discharger may be contacted by mail at P.O. Box 496071, Redding, CA 96049-6071. The treatment system provides advanced secondary level biological treatment and consists of screening for removal of large solids, grit removal, primary clarification, activated sludge treatment with secondary clarification, filtration, chlorination/dechlorination, flow equalization, and emergency storage. Sludge is treated by anaerobic digestion followed by dewatering using a centrifuge and then disposed of at a sanitary landfill. Class B biosolids from the secondary treatment process may also be land applied on property owned by the Discharger. Approximately 8.8 million gallons per day (dry weather flow) of treated waste is discharged through an outfall line and diffuser to the Sacramento River, a water of the United States. The discharge is regulated under an existing National Pollutant Discharge Elimination System (NPDES) permit. The Discharger submitted a Report of Waste Discharge and requested renewal of the existing NPDES permit. Staff recommends the Central Valley Water Board adopt the tentative NPDES permit to regulate discharge from the Facility.

A public hearing to address this matter will be held during the Central Valley Water Board meeting, which is scheduled for:
